

ANNUAL REPORT

2017/2018

Name of Regional Network: Mersey Clinical Audit Network (MCAN).

Regional Network Chair: Michael Spry

It has been another successful year for the Mersey Clinical Audit Network (MCAN). We have seen our membership grow, active use of and engagement with our local email forum. We have seen a good take up of membership of the NQICAN Forum, and have recently demonstrated it again at our network meeting to encourage members to use it. We continue to hold our quarterly meetings in host Trusts and organisations across the region, which enables us to see how different organisations work.

We continue to participate in the regional conferences and events that we hold alongside the Lancashire & Cumbria, Greater Manchester and North West Mental Health networks. The most recent one was a very successful day held at Southport.

We have engaged in active group education, for example, a recent meeting saw us discuss at length how the new GDPR legislation would impact clinical audit.

Despite the hectic backdrop of the day job, which unfortunately caused our January meeting to be cancelled due to pressures of work, the network continues to find the opportunity to gather for peer support and learning extremely valuable.
